

AirScape

*Portable
Free-Span
Environments*

**Quick Deploy
Modular
Portable**

**Seasonal
Temporary
Permanent**

... the *only* large free span structures that support natural turf and vegetation.

Originally designed as greenhouses

Produces efficient, *healthy and thriving* environments.

Developed by Goodyear Tire & Rubber

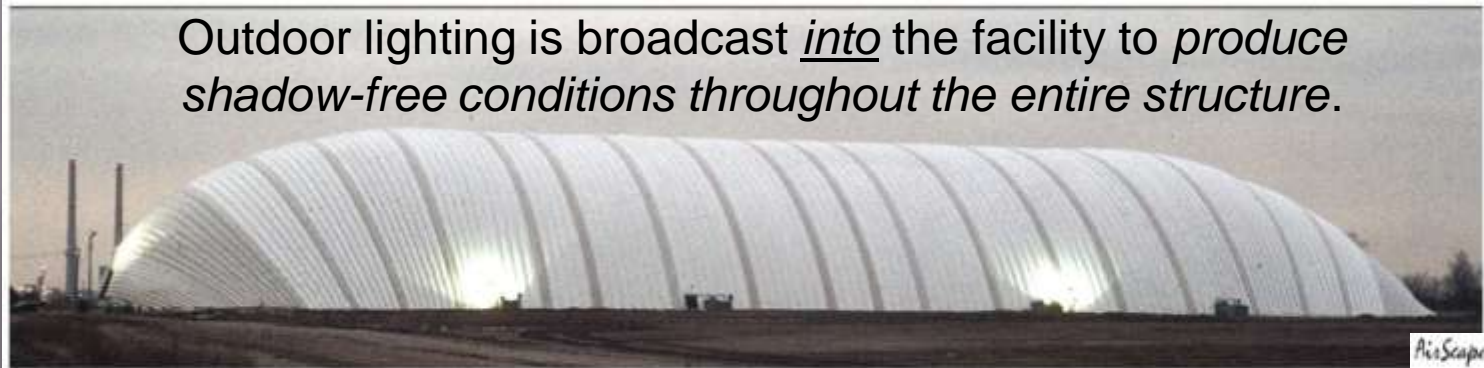

Indoor Lighting NOT Required

Natural Sunlight from Dawn to Dark

Cables Obstruct Only 1% of Incoming Light

This structure is illuminated with outdoor lighting from the opposite side.

Outdoor lighting is broadcast *into* the facility to *produce shadow-free conditions throughout the entire structure.*

Shadow-Free Interior

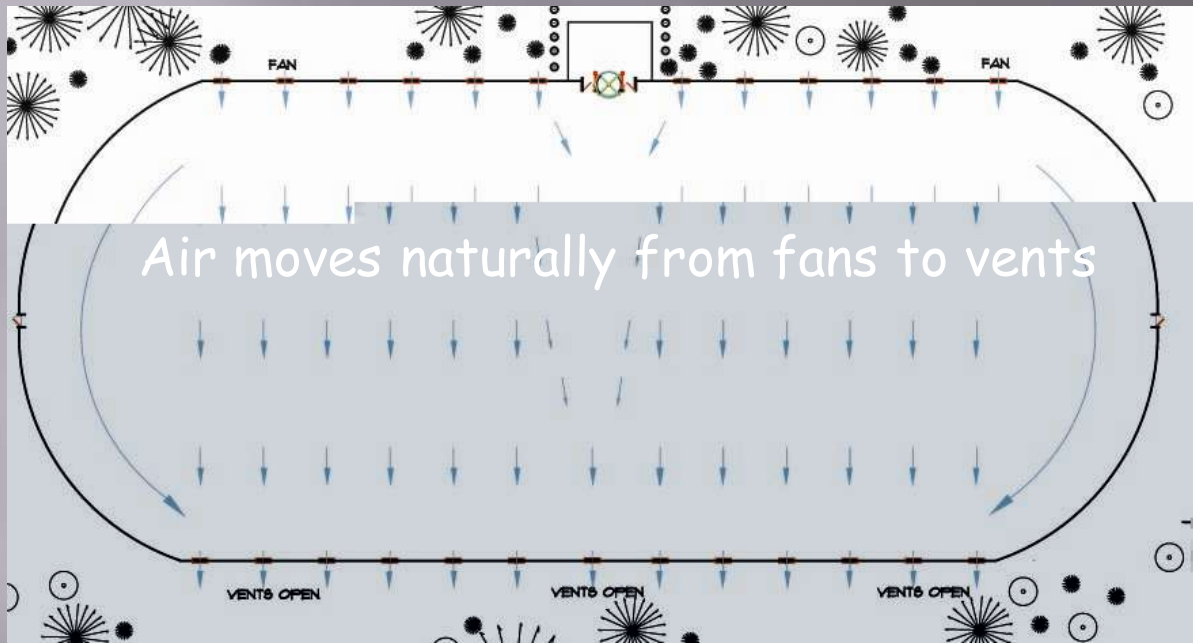

Broadcast conditions
day and night

Light passing through the cover
creates *solar heat gain* and
free lighting all day!

to create daytime conditions.

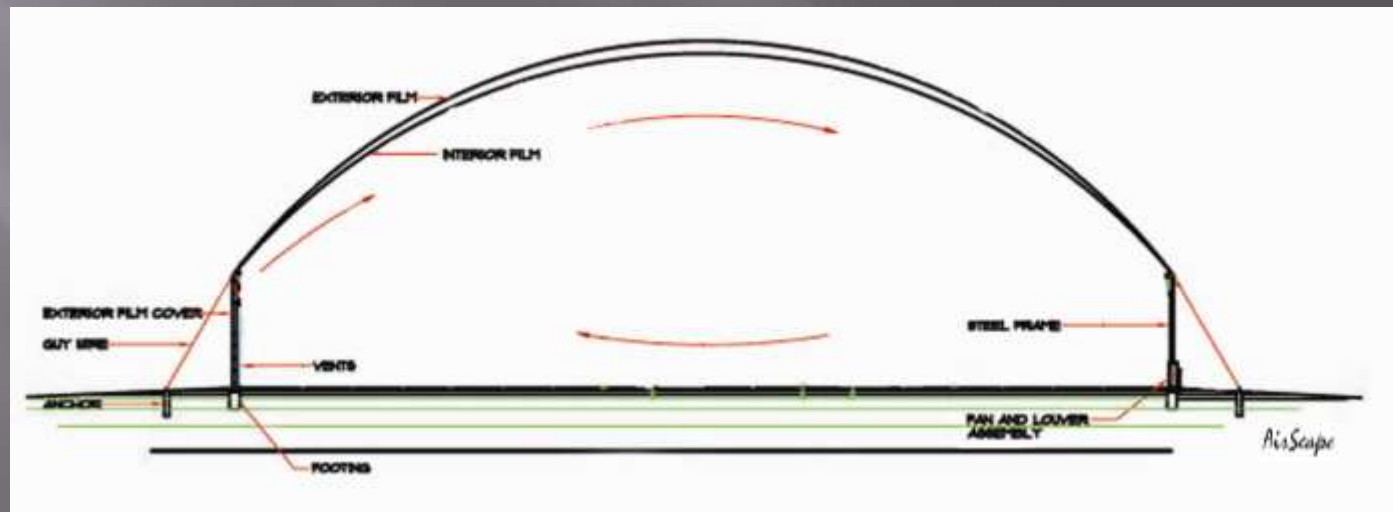

Natural Circulation = Fresh Air

Air can be exchanged as often as once per minute!

Moisture is kept under control for a clean and dry mold resistant environment.

Easy and Efficient to Heat and Cool

Echo-Free Acoustics

Pleasant and easy communication

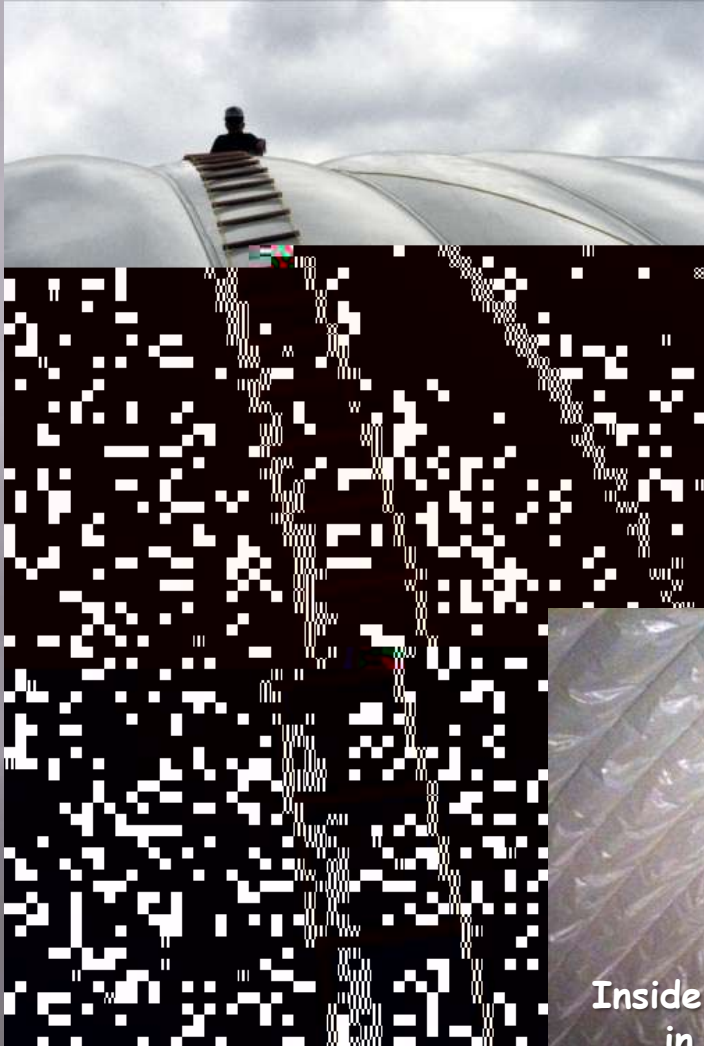

Fire retardant
Mold resistant
Self-cleaning

Sound is absorbed in
our *soft* design cover

Sturdy engineering supports heavy loads

Inside materials glisten in night lighting

One-Piece Cover is deployed in hours ...

2,200 sq. m. cover ready for shipment

The one-piece cover includes the cables, into the fabric.

This portable cover was deployed in 2 hours and inflated in 3 minutes.

Above Ground Anchoring

are quick and simple.

**Set and load Manta Ray
anchors in 6 minutes.
www.earthanchor.com**

Sub Surface Anchoring

1.

2. The site is prepped with anchors and electricity

3. The one-piece cover is spread out and attached to the anchors

4. The power is turned on and within 5 minutes the building is fully functional

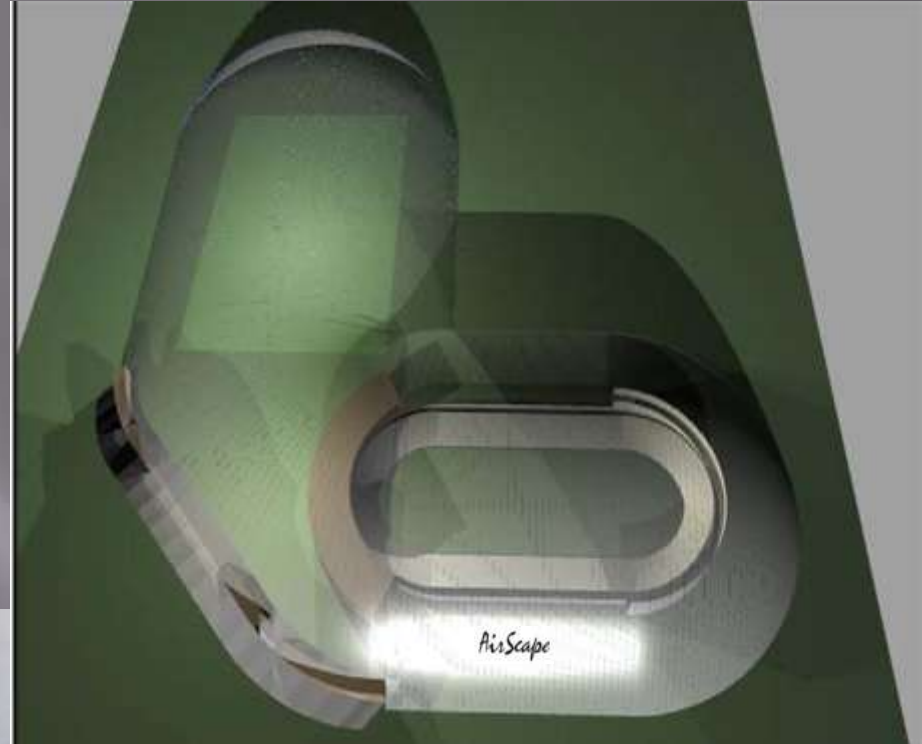

This 12,000 sq. ft. temporary building was deployed in 2 days, then disassembled by six people, with a total of six tools, and packed into a 10 meter trailer in less than 10 hours.

Any size, shape or color...

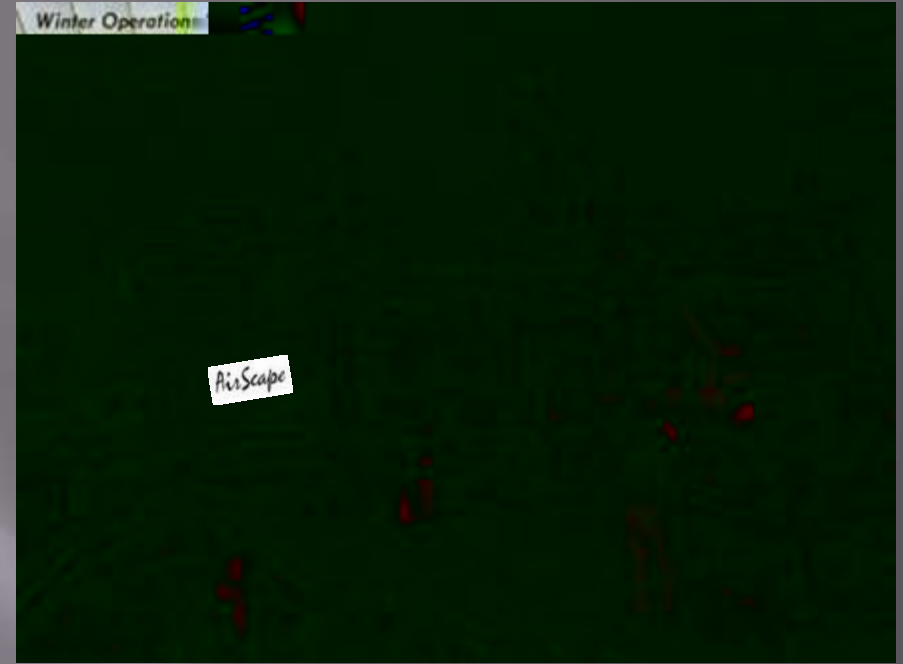

No Known Size Limits

Construction Under Cover

Allows open doors without airlocks

built and fired up inside this AirScape

Remediation Site Enclosures

Quick Deploy Enclosures

When it breaks in the field...

1. Surround it...

2. Cover it...

3. Repair it...

4. Store it...

do it again!

Unlimited Applications...
